

Flood and Drought Management Tools update Vol.13

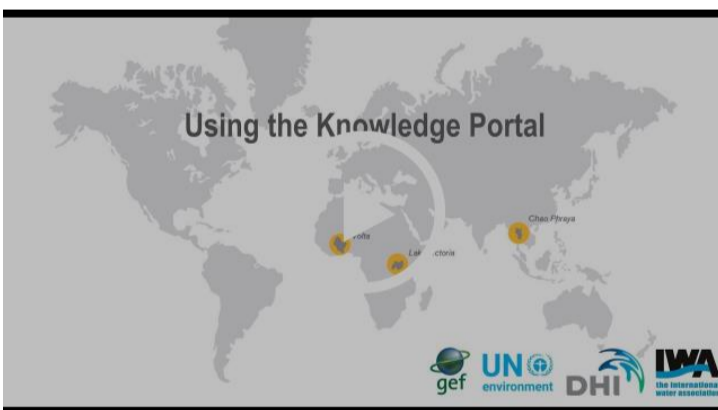

Visit the Flood and Drought portal at <http://www.flooddroughtmonitor.com> to have an overview of the technical applications – from data and information to water indicators to basin planning. Additional training material is being developed to help guide users on the applications and how to integrate them into planning. All updates are available through the project [portal](#) and [website](#).

A repository of knowledge on water related issues

In today's interconnected world, the interaction between knowledge, communication and action is more vital than ever before, access to the right information is crucial in understanding and solving the many issues globally. [Read more...](#)

2nd Flood and Drought Symposium: Chao Phraya

The 2nd Flood and Drought Symposium event was jointly hosted by Hydro and Agro Informatics Institute (HAI), the Metropolitan Waterworks Authority (MWA) and the Provincial Waterworks Authority (PWA), institutions that have been key stakeholders in Thailand for the FDMT project. The event was an opportunity to present on the strategies and approaches being used to effectively prepare and

Events

A series of technical trainings have been organised with key stakeholders, from basin level organisations to water utilities, to test the technical applications and receive feedback to inform the development of key functionality. Training has been held in Ouagadougou, Accra, Kisumu and Bangkok between the 11th April to 28th June 2018. More information on these trainings are available [here](#).

Upcoming events

- Session: [Smart Water Systems for Improved Human, Environmental and Economic Health](#) @ [World Water Week](#) | August 30, 2018
- Session: [Smart Water Management case study lessons from around the world](#) @ [Korea International Water Week](#) | September 14, 2018
- Workshop: [Climate Resilient Water Safety & Security Planning](#) @ [World Water Congress: Tokyo, Japan](#) | September 18, 2018
- Training: [Climate smart utilities - tools for building resilience](#) @ [World Water Congress: Tokyo, Japan](#) | September 18, 2018
- Demonstration: [Building climate resilience through improved planning: A demonstration of the Flood and Drought Portal](#) @ [World Water Congress: Tokyo, Japan](#) | September 19, 2018
- Webinar: [Interpreting climate information for water utilities](#) | October 25, 2018
- Webinar: [Climate Resilient Water Safety Planning](#) | November 28, 2018

The FDMT project is always looking for opportunities to promote project outputs and engage with key stakeholders. If you are aware of any relevant events, please do not hesitate to contact the project team.

Contribute to the next FDMT newsletter

The FDMT project releases every 2-3 month a newsletter providing an update on the project and highlighting your initiatives, projects, programmes and events. The next newsletter will be released in October/November. We welcome your contribution showcasing the work you are doing in the water sector to help improve water resources management in your basin, or highlighting the work other basin stakeholders are undertaking to make a difference in the improvement of water resources conservation. We look forward to any contributions you wish to share. Please share your contribution with Raul Glotzbach (Raul.Glotzbach@iwahq.org).

Previous editions of the FDMT newsletter are available on the project website: fdmt.iwlearn.org/docs/newsletters.

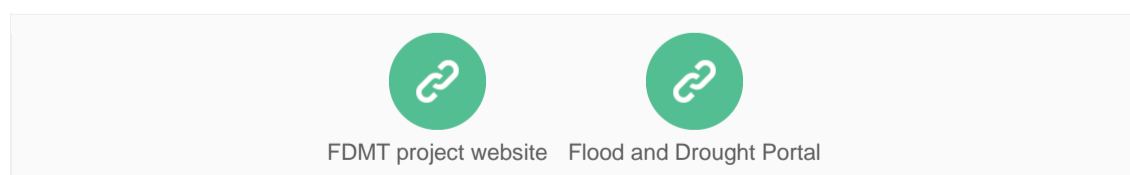

Please feel free to distribute this newsletter to your wider network and if you have any questions for the project, please do not hesitate to contact us.
